THE SOLUTION FOR VEHICLE TAX COLLECTION AT CHECKPOST

CHECKPOST portal is meant to be a common platform from where various checkpost services are provided to citizens, as and when they are developed by the department. These services are being started for online checkpost tax payment of vehicles. The owners of these vehicles can access to the portal from any internet access point, and deposit their due taxes through net banking facility. This system will save them the trouble of physically coming to the transport office, while the department will be able to collect their taxes in a cashless and seamless way. Once the user logs on to the system and provides the required information about the vehicle, the software calculates and displays the tax amount payable. If the user accepts to make the payment, the portal redirects him to selected bank or treasury site. The user then makes the payment from his bank account through secure Internet Banking. Once the transaction is complete, the software generates a detailed receipt, which can be printed by the user for his records. For checking the authenticity of receipt, the transport department officials will be able to cross-check the payment details by logging on to the portal using this web-based software. They can also view / print various reports which will be generated for officials of the transport department.
